Design Life

Made in the UK

SETTING NEW STANDARDS

Accesso inspection chambers and manhole bases are designed and manufactured to comply with BS EN 13598-2. For use in both Adoptable and Non - Adoptable installations.

To comply with EN 13598-2, our Accesso chambers and manhole bases are made from a prescribed set of components, that dependant on the range, will include one or all of the following materials - unplasticized poly (vinyl chloride) (PVC-U), polypropylene (PP) and polyethylene (PE).

The components, which usually exist of a base chamber and access shaft, are assembled in our factory, which then produces our Accesso Single Piece Inspection Chambers.

The Accesso Range is also compliant with Section H of the Building Regulations and in 2021, we updated the range, so that all of our products are now fully compliant with the Design and Construction Guidance (DCG), which superseded Sewers for Adoption - SFA7, in April 2020.

DCG is now being used by Specifiers, Engineers, Consultants and Water Companies, throughout the UK for both Adoptable and also Non - Adoptable Drainage Design.

Parts B & C of DCG, defines the designs of two types of Inspection Chamber- Type D and E, and within Part C of the Guidance regards the designs, it stipulates that:

"Inspection chambers and manholes must have a minimum 50mm fall from side inlet to main channel".

All Accesso Inspection Chamber bases meet the Design & Construction Guidance standard, as all our chamber bases have the required minimum 50mm fall from side inlets to main channel . .

. . putting the ACCESSO range, ahead of the competition.

As previously stated, DCG has also changed the allowable maximum depths of Inspection Chambers for Adoption. The prescribed maximum depth of an Inspection Chamber from cover level to soffit of pipe (detailed on illustration above) is now 2 metre's. Whereas before, using the guidance from Sewers for Adoption - SFA7 , this was invert depth from cover level and the maximum depth was 3 metre's.

The maximum depths for Inspection Chambers in accordance to DCG is detailed in the table below, along with chamber types and diameters available.

Accesso Inspection Chambers	orange range			blue range

Catch-pit chambers

Catch-pit chambers

ACCESSO BLUE RANGE catchpits are delivered to site already pre assembled in our factory. Making these single piece units, quick and easy to install, as they need no construction or wet trades, offering significant onsite savings against pre cast concrete and other traditional construction methods. They are relatively lightweight and no machinery or lifting equipment is required.

There are five diameters available, from 300mm to 1050mm, with a choice of five standard depths, from 1 to 3 metres, with deeper chambers available on request.

Restriction Caps

Available for full range -
Required to reduce the access into the chamber to maximum diameter of 350mm, to meet DCG - Design & Construction Guidance

Robust twinwall access shaft

Allows for granular surround.
The profile makes the shaft easy to cut to required depth

Adaptors

A wide range of adaptors are available to connect to most other pipe systems

Access Covers & Reduction Caps

Access covers fit directly into 300 & 450 series access shaft and for fit into the 600 series chambers, they require a **600450RC** reduction cap. Please Note that both covers are A15 loading only

Various pipe connections available.

Diameter will be dependant on series/model

Integrally moulded pipes

Giving options on site and ensuring watertight connections

High strength profiled base

Protects against buckling in high water tables

300mm sump

300 SERIES

MODEL: **AICCP300B**
Catch-Pits for use with 110mm EN 1401 pipe systems

Description

300mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant rota moulded base, with four moulded pipe spigots to accommodate - 110mm EN 1401 pipe fittings. All spigots have blind ends, that can be cut off on site, if required. The main outlet connection will also accommodate 150mm twinwall and 160mm EN 1401 pipe with use of adaptor.

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight

450 SERIES

MODEL: **AICCP450B**
Catch-Pits for use with 110/160mm EN 1401 pipe systems

Description

450mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rota moulded base with four moulded pipe spigots to accommodate - 110/160mm EN 1401 pipe fittings. All spigots have blind ends, that can be cut off on site, if required. The main outlet connection can also accommodate 150mm twinwall pipe.

AICCP450B (Base Only)	110	2 x 110 or 160	750	6	5

Restriction Caps & Access Covers

Chambers deeper than 1500mm require a Restriction Cap Product Code - 450RCC to comply with DCG - Design & Construction Guidance.

Optionally, the 450 series chambers can be supplied with a restricted access cover, either a circular or square section, both have the required 350mm diameter restricted access. Both covers are designed to fit inside the access shaft.

450RCC	Restriction Cap to 350mm Ø access			30	3
450SR	Sealing Ring for Restriction Cap to access shaft			50	2
450ACCRA	450mm Ø access cover - circular with integral 350mm restricted access - A15 Loading			32	6.5
450ACSRA	450mm Ø access cover - square section with integral 350mm restricted access - A15 Loading			32	14

Adaptors

Adaptors are available to connect to other pipework with a 150mm internal diameter.

TW150150SPIS	Adaptor to all 150mm pipe systems - internal connection			N/A	1
---------------------	---	--	--	-----	---

450 SERIES

MODEL: **AICCP450225B**
Catch-Pits for use with 225mm twinwall pipe systems

Description

450mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rotamoulded base with moulded pipe spigots. The main channel features 225mm twinwall inlet and outlet pipe sockets, which are factory fitted with rocker pipes. Fitted wall seals can be supplied to offer - 110/160mm EN 1401 pipe connections (See Adaptors below).

Restriction Caps & Access Covers

To comply with DCG - Design & Construction Guidance, chambers deeper than 1500mm require our Restriction Cap - 450RCC. This restricts the access diameter to 350mm. Optionally on the 450 series, chambers can be supplied with a restricted access cover, either a circular or square section cover, both have the required 350mm diameter restricted access.

600 SERIES

MODEL: **AICCP600B**
Catch-Pits for use with 110/160mm EN 1401 and 225/300mm twinwall pipe systems

Description

600mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rotamoulded base with moulded pipe spigots. The main channel has several pipe options - 160mm EN 1401, 225mm and 300mm twinwall, both twinwall options come with rocker pipe connections. Side connections are moulded spigot connections, that accommodate either 110mm and 160mm EN 1401 pipe fittings or a 225mm twinwall rocker pipe. All spigots have blind ends that can be cut off on site if required.

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap Product Code - 600RCC to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a 600450RC Reduction Cap, which will accommodate either a circular or square section cover, both have the required 350mm diameter restricted access.

Adaptors & Rocker Pipes

Adaptors are available for both 450 & 600 series ranges to fit various other pipe systems, including UltraRib, Polysewer, Marley Quantum and FUNKE HS. As well as reducers to smaller twinwall systems.

225mm rocker pipes are also available for side inlet connections to AICCP600B.

WSA138110 and WSA180160 adaptors offer side connections to AICCP450225, as illustrated in the image opposite.

750 SERIES

MODEL: **AICCP750450B**
Catch-Pits for use with 450mm twin wall pipe system

Description

750mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required. Standard chamber comes with outlet spigot connection at 0° to main channel and a choice of main inlet positions, from 90° to 270°. If not stipulated the inlet will be at 180°. Further optional side inlets are available, within the same degree spectrum (see below).

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap Product Code - 750RC to comply with DCG - Design & Construction Guidance.

Optionally chambers can be supplied with fitted ladders.

1050 SERIES

MODEL: **AICCP1050B**
Catch-Pits for use with 150mm to 450mm twinwall pipe systems

Description

1050mm diameter - Factory built inspection chamber catch-pits, delivered to site as single piece units, ready to install, no assembly required.

Standard chamber comes with outlet spigot connection at 0° to main channel and a choice of main inlet positions, from 90° to 270°. If not stipulated the inlet will be at 180°.

Further optional side inlets are available, within the same degree spectrum (see below).

SURFACE WATER SYSTEMS

Inspection chambers

Inspection chambers

ACCESSO BLUE RANGE inspection chambers are delivered to site already pre assembled in our factory. Making these single piece units, quick and easy to install, as they need no construction or wet trades, offering significant onsite savings against pre cast concrete and other traditional construction methods. They are relatively lightweight and no machinery or lifting equipment is required for the vast majority of the range.

There are three diameters available - 450mm, 600mm and 1050mm and a choice of five standard depths, from 1 to 3 metres, with deeper chambers available. Chamber bases can be used separately for shallow invert installations and also at the base of a PCC manhole, offering a pre-formed option to labour intensive benching.

Restriction Caps

Available for full range -
Required to reduce access to maximum 350mm diameter, to meet Design & Construction Guidance

Inspection Chamber Bases

Bases are rota moulded polyethylene, making them robust and impact resistant. Various pipework configurations and diameters are available and bases can be used individually for shallow invert installations and also at the base of a PCC manhole, offering a pre-formed option to labour intensive benching

Access Covers & Reduction Caps

Option of two access covers that fit directly into 450 series access shaft and for fit into the 600 series chambers, they require a **600450RC** reduction cap.
Please Note that both covers are A15 loading only

Robust twinwall access shaft

Allows for granular surround. The profile makes the shaft easy to cut to required depth

Adaptors

A wide range of adaptors are available to connect to most other pipe systems

Rocker Pipes

Fitted as standard on main channel on all Blue Range Inspection Chambers

Minimum 50mm step

Required from side inlet channel to main channel to meet Design & Construction Guidance and Adoptable Standards

Moulded feet

Lifts the chamber pipework off the base of the trench, allowing for connections to be made, preventing dirt ingress

450 SERIES

MODEL: **AIC450150B**
Inspection Chamber for use with 150mm twinwall pipe systems

Description

450mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rota moulded base. This model has 150mm twinwall rocker pipe connections to main channel and two further optional 150mm twinwall side connections at 90°, these have blind ends that can be cut off on site if required. Separate 150mm rocker pipes are available for side inlets, as well as adaptors to offer - 110/160mm EN 1401 side connections or 225mm twinwall (outlet only).

Base only - Comes without any rocker pipes fitted.

Restriction Cap - 450RCC

Restriction Caps & Access Covers

To comply with DCG - Design & Construction Guidance, chambers deeper than 1500mm require our Restriction Cap - 450RCC. This restricts the access diameter to 350mm.

Optionally on the 450 series, chambers can be supplied with a restricted access cover, either a circular, or square section cover, both have the required 350mm diameter restricted access.

600 SERIES

MODEL: **AIC600150B**
Inspection Chamber for use with 150mm twinwall pipe systems

Description

600mm diameter - Factory built inspection chamber, delivered to site as single piece units, ready to install, no assembly required.

Chamber base comes with 150mm twinwall rocker pipe connections to main channel. The chamber also has two optional, 150mm twinwall side connections at 90°. Side inlets are supplied with blind ends for cutting on site. Adaptors can be supplied to offer various side inlet connections.

Base only - Comes without any rocker pipes fitted.

Effective Height 285mm

Reduction Cap - 600450RC

Restriction Cap - 600RCC

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap - 600RCC, to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a Reduction Cap - 600450RC, which will accommodate, either a circular or square section cover, both have the required 350mm diameter restricted access.

Adaptors & Rocker Pipes

Adaptors available are for both 450 and 600 series models.

150mm rocker pipes are also available for side inlet connections on all models, these come with a seal, ready for connection.

WSA138110	EPDM seal connection to 160mm EN1401 pipe			N/A	0.5
WSA180160	EPDM seal connection to 160mm EN1401 pipe			N/A	1
TWR225150	Adaptor from 150mm to 225mm twinwall (outlet only)			60	2
150TWRP	150mm twinwall rocker pipe and seal			N/A	0.5

600SERIES

MODEL: **AIC600225B**
Inspection Chamber for use with 225mm & 150mm twinwall pipe systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rita moulded base. This model has 225mm twinwall connections to main channel and optional 150mm twinwall side connections at 60°, these are provided with blind ends that can be cut off on site, if required. Chambers come with 225mm twinwall rocker pipes to main channel and 150mm rocker pipes are available for side inlets, as well as a wide range of adaptors to fit both main and side channels.

Base only - Comes without any rocker pipes fitted.

MODEL: **AIC600225225B**
Inspection Chamber for use with 225mm twinwall pipe systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rita moulded base. This model has 225mm twinwall connections to main channel and optional 225mm twinwall side connections at 90°, which are provided with blind ends that can be cut off on site, if required. Chambers come with 225mm twinwall rocker pipes to main channel and further 225mm rocker pipes are available for side inlets, as well as a wide range of adaptors to fit both main and side channels.

Base only - Comes without any rocker pipes fitted.

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight (kg)

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap Product Code - 600RCC to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a Reduction Cap - 600450RC, which will accommodate either a circular, or square section cover, both have the required 350mm diameter restricted access.

600RCC	Restriction Cap to 350mm Ø access	10	4
600SR	Sealing Ring for Restriction Cap to access shaft	30	3
300DC	300mm Ø Debris Cover	60	3
600450RC	Reduction Cap from 600mm to 450mm Ø access to accommodate - 450ACCRA and 450ACSRA	8	6.5
450ACCRA	450mm Ø access cover - circular with integral 350mm restricted access - A15 Loading	32	6.5
450ACSRA	450mm Ø access cover - square section with integral 350mm restricted access - A15 Loading	32	14

Adaptors & Rocker Pipes

Adaptors are available for side channels, to allow connection to 110mm and 160mm EN 1401 connections and for main 225mm channel, there are reducers to 150mm twinwall and 160mm EN1401. As well as adaptors to 225mm UltraRib, Polysewer and Marley Quantum.

150mm rocker pipes are also available for side inlet connections, these come with a seal, ready for connection.

WSA138110	EPDM seal connection to 160mm EN1401 pipe	N/A	0.5
WSA180160	EPDM seal connection to 160mm EN1401 pipe	N/A	1
TW225225UR	Adaptor - 225mm twinwall to 225mm UltraRib	60	2
TW225225PS	Adaptor - 225mm twinwall to 225mm Polysewer	60	2
TW225225MQ	Adaptor - 225mm twinwall to 225mm Marley Quantum	60	2
TWR225160	225mm twinwall to EN1401 160mm pipe socket	60	2
TWR225150	225mm twinwall to 150mm twinwall pipe socket	60	2
TWR300225	300mm to 225mm twinwall pipe socket	40	3
150TWRP	150mm TW rocker pipe and seal	N/A	0.5
225TWRP	225mm TW rocker pipe and seal	N/A	1.5

600SERIES

MODEL: **AIC600300B**
Inspection Chamber for use with 300mm & 225mm twinwall pipe systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rota moulded base. This model has 300mm twinwall connections to main channel and optional 225mm twinwall side connections, at 90°, these are provided with blind ends that can be cut off on site, if required.

Chambers come with 300mm twinwall rocker pipes to main channel and 225mm rocker pipes are available for side inlets, as well as a wide range of adaptors to fit both main and side channels.

Base only - Comes without any rocker pipes fitted.

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight (kg)
--------------	------------------------------	---------------------------	--------------------	------------	---------------------

AIC600300B (Base only)	300 twinwall	2 x 225 twinwall @ 90°	650	3	14
AIC600300B/1	300 twinwall	2 x 225 twinwall @ 90°	1115	2	32
AIC600300B/1.5	300 twinwall	2 x 225 twinwall @ 90°	1595	1	41
AIC600300B/2	300 twinwall	2 x 225 twinwall @ 90°	1985	1	49
AIC600300B/2.4	300 twinwall	2 x 225 twinwall @ 90°	2375	N/A	57
AIC600300B/3	300 twinwall	2 x 225 twinwall @ 90°	3000	N/A	66

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap - 600RCC, to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a Reduction Cap - 600450RC, which will accommodate either a circular or square section cover, both have the required 350mm diameter restricted access.

600RCC	Restriction Cap to 350mm Ø access		10	4
600SR	Sealing Ring for Restriction Cap to access shaft		30	3
300DC	300mm Ø Debris Cover		60	3
600450RC	Reduction Cap from 600mm to 450mm Ø access to accommodate - 450ACCRA and 450ACSRA		8	6.5
450ACCRA	450mm Ø access cover - circular with integral 350mm restricted access - A15 Loading		32	6.5
450ACSRA	450mm Ø access cover - square section with integral 350mm restricted access - A15 Loading		32	14

Adaptors & Rocker Pipes

Adaptors are available to fit various diameters from 110mm to 315mm and for pipework systems, including - UltraRib, Polysewer, Marley Quantum and FUNKE HS. As well as reducers to smaller twinwall systems.

225mm rocker pipes are also available for side inlet connections.

WSA138110	EPDM seal connection to 160mm EN1401 pipe		N/A	0.5
WSA180160	EPDM seal connection to 160mm EN1401 pipe		N/A	1
TW225225UR	Adaptor - 225mm twinwall to 225mm UltraRib		60	2
TW225225PS	Adaptor - 225mm twinwall to 225mm Polysewer		60	2
TW225225MQ	Adaptor - 225mm twinwall to 225mm Marley Quantum		60	2
TWR225160	225mm twinwall to EN1401 160mm pipe socket		60	2
TWR225150	225mm twinwall to 150mm twinwall pipe socket		60	2
TWR300225	300mm to 225mm twinwall pipe socket		40	3
TW300300UR	Adaptor - 300mm twinwall to 300mm UltraRib		40	3.5
TW300300PS	Adaptor - 300mm twinwall to 300mm Polysewer		40	3.5
TW300315HS	Adaptor - 300mm twinwall to 315mm FUNKE HS		40	3.5
225TWRP	225mm TW rocker pipe and seal		40	1.5

1050 SERIES

MODEL: **AIC1050**
Inspection Chamber for use with 150mm to 450mm twinwall pipe systems

Description

1050mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model comes with choice of main channel diameters - 150mm to 450mm twinwall and with four optional channel configurations, as shown adjacent - Straight, 30°, 45° and 90°.

Product Code	Main channel pipework Ø (mm)	Channel Orientation	Overall Depth (mm)	Pallet Qty	Approx. Weight
AIC1050/1	150 - 450	Straight, 30°,45° & 90°	1040	N/A	80
AIC1050/1.5	150 - 450	Straight, 30°,45° & 90°	1565	N/A	100
AIC1050/2	150 - 450	Straight, 30°,45° & 90°	1980	N/A	120
AIC1050/2.4	150 - 450	Straight, 30°,45° & 90°	2400	N/A	137
AIC1050/3	150 - 450	Straight, 30°,45° & 90°	2912	N/A	160

MODEL: **AIC1050SI**
Inspection Chamber for use with 150mm to 450mm twinwall pipe systems

Description

1050mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model comes with choice of main channel diameters from 150mm to 450mm twinwall and with a choice of side inlet diameters, which are positioned at 90° to the main channel.

Product Code	Main channel pipework Ø (mm)	Side inlet options (mm)	Overall Depth	Pallet Qty	Approx. Weight
AIC1050SI90/1	150 - 450	150, 225 or 300 @ 90°	1040	N/A	85
AIC1050SI90/1.5	150 - 450	150, 225 or 300 @ 90°	1565	N/A	105
AIC1050SI90/2	150 - 450	150, 225 or 300 @ 90°	1980	N/A	125
AIC1050SI90/2.4	150 - 450	150, 225 or 300 @ 90°	2400	N/A	142
AIC1050SI90/3	150 - 450	150, 225 or 300 @ 90°	2912	N/A	165

Restriction & Reduction Caps

Chambers deeper than 1500mm require a Restriction Cap - 1050RCC, to comply with DCG - Design & Construction Guidance.

1050RCC	Restriction Cap to 350mm Ø access	8	17
1050SR	Sealing Ring for Restriction Cap to access shaft	30	9

Adaptors

Adaptors are available to fit various diameters, from 110mm to 315mm and for pipework systems, including - UltraRib, Polysewer, Marley Quantum and FUNKE HS. As well as reducers to smaller twinwall systems.

225mm rocker pipes are also available for side inlet connections.

TW150150SPIS	Adaptor to all 150mm pipe systems - internal connection	N/A	1
TW225225UR	Adaptor - 225mm twinwall to Ultra Rib	60	2
TW225225PS	Adaptor - 225mm twinwall to Polysewer	60	2
TW225225MQ	Adaptor - 225mm twinwall to 225mm Marley Quantum	60	2
TW300300UR	Adaptor - 300mm twinwall to 300mm ULTRA RIB	40	2
TW300300PS	Adaptor - 300mm twinwall to 300mm POLYSEWER	40	3.5
TW300315HS	Adaptor - 300mm twinwall to 315mm FUNKE HS	40	3.5

orange range

FOUL & SURFACE WATER SYSTEMS

Inspection chambers

Inspection chambers

ACCESSO ORANGE RANGE inspection chambers are delivered to site already pre assembled in our factory. Making these single piece units, quick and easy to install, as they need no construction or wet trades, offering significant onsite savings against pre cast concrete and other traditional construction methods. They are relatively lightweight and no machinery or lifting equipment is required for the vast majority of the range.

There are two diameters available - 450mm and 600mm and 5 standard depths available, from 1 to 3 metres, with deeper chambers available on request. Chamber bases can be used separately for shallow invert installations and also at the base of a PCC manhole, offering a pre-formed option to labour intensive benching.

Restriction Caps

Available for full range - Required to reduce access to maximum 350mm, to meet Design & Construction Guidance

Inspection Chamber Bases

Bases are either injection or rota moulded from PP or PE, dependant on range. Various pipework configurations and diameters are available. Bases can be used individually for shallow invert installations and also at the base of a PCC manhole, offering a pre-formed option to labour intensive benching

Minimum 50mm step

Required from side inlet channel to main channel to meet Design & Construction Guidance and Adoptable Standards

Access Covers & Reduction Caps

Option of two access covers that fit directly into 450 series access shaft and for fit into the 600 series chambers, they require a 600450RC reduction cap.

Please Note that both covers are A15 loading only

Robust twinwall access shaft

Allows for granular surround. The profile makes the shaft easy to cut to required depth

Inlet Connections & Adaptors

Dependant on the model, there is a choice of main channel connections from 110mm to 315mm. With a range of adaptors available for connection to other pipework systems

Moulded feet

Lifts the chamber pipework off the base of the trench, allowing for connections to be made, preventing dirt ingress

450 SERIES

MODEL: **AIC110450BR**
Inspection Chamber for use with 110mm EN 1401 pipe systems

Description

Chamber base comes with 110mm socket connections to main channel and four further 110mm inlets, two at 90° to main channel and two at 45°. Side inlets are supplied with blanking plugs. Chambers will come factory assembled, ready for installation

MODEL: **AIC160450BR**
Inspection Chamber for use with 160mm and 110mm EN 1401 pipe systems

Description

Chamber base comes with 160mm socket connections to main channel and two further 160mm inlets, at 90° to main channel and two 110mm inlets at 45°. Side inlets are supplied with blanking plugs. Chambers will come factory assembled, ready for installation

Extension Risers & Access Covers

Extension risers and access covers for AIC110 & 160BR range

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight
AIC110450BR1	110	2 x 110 at 90° & 2 x 110 at 45°	435	16	3.5
AIC110450BR2	110	2 x 110 at 90° & 2 x 110 at 45°	632	12	5

MODEL: **AIC110450SP**
Inspection Chamber for use with 110mm EN 1401 pipe systems

Description

450mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model has an injection moulded chamber base, which has 110mm socket connections to main channel and four optional 110mm side connections - Two at 90° and two at 45°. All side inlets are supplied with socket plugs, which can be simply removed for use on site.

MODEL: **AIC160450SP**
Inspection Chamber for use with 160mm and 110mm EN 1401 pipe systems

Description

450mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model has an injection moulded chamber base, which has 160mm socket connections to main channel and two optional 160mm side connections at 90° and two 110mm connections at 45°. All side inlets are supplied with socket plugs, which can be simply removed for use on site.

Restriction Caps & Access Covers

Chambers deeper than 1500mm require a Restriction Cap - 450RCC, to comply with DCG - Design & Construction Guidance.

Optionally the 450 series chambers can be supplied with a restricted access cover, either a circular or square section cover, both have the required 350mm diameter restricted access.

Adaptors & Non Return Valves

Adaptors are available for connection to 150mm UltraRib and 150mm and 225mm twinwall.

Our Buffalo Non Return Valves simply push into the inlets on our 110mm and 160mm inspection chamber models. The BNRV110 is unique, in that it push fits into the side inlets in all injection moulded bases. Both units can be locked for maintenance purposes.

600SERIES

MODEL: **AIC110600SP**
Inspection Chamber for use with 110mm EN 1401 pipe systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model has an injection moulded chamber base, which has 110mm socket connections to main channel and four optional 110mm side connections - Two at 90° and two at 45°. All side inlets are supplied with socket plugs, which can be simply removed for use on site.

MODEL: **AIC160600SP**
Inspection Chamber for use with 160mm and 110mm EN 1401 pipe systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

This model has an injection moulded chamber base, which has 160mm socket connections to main channel and two optional 110mm side connections at 90° and two 110mm connections at 45°. All side inlets are supplied with socket plugs, which can be simply removed for use on site.

MODEL: **AIC600200B**
Inspection Chamber for use with 200mm single wall PVC-U pipe systems, including Funke HS & DYKA ULTRA 3 systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rotamoulded base. Chamber base comes with a 200mm main channel, with spigot connections which accept a 200mm PVC-U single wall pipe fitting. The chamber also has two optional 200mm side connections @ 90°, which can also be supplied as 150mm twinwall, for surface water connections. Side inlets are supplied with blind ends, for cutting on site. Adaptors and rocker pipes can be supplied, to offer various side inlet connections.

Reduction Cap - 600450RC

Effective Height 285mm

Restriction Cap - 600RCC

Restriction Caps & Access Covers

Chambers deeper than 1500mm require a Restriction Cap - 600RCC, to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a Reduction Cap - 600450RC, which will accommodate either, a circular or square section cover, both have the required 350mm diameter restricted access.

Adaptors

Adaptors and rocker pipes are available channels to allow connection to 150mm UltraRib and 150mm twinwall. AIC110600SP and AIC160600SP, can be adapted to offer, 225mm twinwall on outlet only.

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight

Pre - assembled chambers

Lightweight, quick and easy to install

No plant or lifting equipment required

Designed to meet Adoptable Standard

Design Life

Made in the UK

600SERIES

MODEL: **AIC600250B**
Inspection Chamber for use with 250mm single wall PVC-U pipe systems, including Funke HS & DYKA ULTRA 3 systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rota moulded base. This model has spigot connections to 250mm single wall, PVC-U sewer pipe fittings on the main channel and two further 225mm side connections at 90°, for connection to various 225mm diameter pipe systems with adaptors. Side inlet spigots have blind ends that can be cut off on site if required.

MODEL: **AIC600315A**
Inspection Chamber for use with 315mm single wall PVC-U pipe systems, including Funke HS & DYKA ULTRA 3 systems

Description

600mm diameter - Factory built inspection chambers, delivered to site as single piece units, ready to install, no assembly required.

All chambers feature a robust, impact resistant, rota moulded base. This model has spigot connections to 315mm single wall, PVC-U pipe fittings on the main channel and two further 225mm side connections at 90°, for connection to various 225mm pipe systems with adaptors. Side inlet spigots have blind ends that can be cut off on site if required.

Restriction Caps & Access Covers

Chambers deeper than 1500mm require a Restriction Cap - 600RCC, to comply with DCG - Design & Construction Guidance.

Optionally, chambers can be supplied with a Reduction Cap -600450RC, which will accommodate either a circular, or square section cover, both have the required 350mm diameter restricted access.

Effective Height 285mm

Reduction Cap - 600450RC

Restriction Cap - 600RCC

Adaptors & Rocker Pipes

Adaptors are available to fit various diameters from 110mm to 315mm and for pipework systems, including - UltraRib, Polysewer, Marley Quantum and FUNKE HS.

225mm rocker pipes are also available for side inlet connections.

Product Code	Main channel pipework Ø (mm)	Optional Side Inlets (mm)	Overall Depth (mm)	Pallet Qty	Approx. Weight

Sampling & Distribution chamber

Sampling Chambers - Installed after the outlet of a septic tank or sewage treatment plant, to allow necessary sampling, to check the quality of the discharge from the system before it enters the watercourse. The inlet of the sampling chamber must be a minimum of 150mm up from the base of the chamber and also protrude into the chamber a minimum 75mm, to facilitate a sampling vessel/cup. There should be no sump in the base of a sampling chamber and the outlet should be level with the base.

Distribution Chamber - Provides for the distribution of pre - treated sewerage effluent from Septic Tanks. The chamber outlets when connected, will discharge effluent into and through a designed 'drainage field', of perforated pipes, which then percolates into the ground.

Sampling Chamber

Distribution Chamber

Access Cover
Square section & lockable
- A15 Loading

Chamber Bases
Bases are Rota Moulded from polyethylene, making them very robust and impact resistant.

Robust twinwall access shaft
Allows for granular surround. The profile makes the shaft easy to cut to required depth

Sampling Point
The inlet has a 75mm internal throat, that allows for sampling vessel to get under the pipe, to catch the incoming treated effluent

Connections to Drainage Field
110mm EN 1401 spigots

Optional 160mm connections

Outlet level with base

Sampling & Distribution chamber

MODEL: ASDC300
For use with 110/160mm EN 1401 pipe systems

Description

350mm diameter, combined sampling and distribution chamber, delivered to site as a single piece unit, ready to install with no assembly required. The chamber features a robust, impact resistant, rota moulded base, with the choice of 110mm and 160mm EN 1401 main pipe connections.

There are two further 110mm moulded spigots at 90°, at the base of the unit. These side outlets are for use as a Distribution Chamber, used for releasing final effluent into a designed Drainage Field, the pipe connections come with blind ends for cutting on site, as required.

The base unit only can be supplied separately and can be used with most UK 300mm diameter twinwall pipe systems, for the access shaft.

Product Code	Description	Pallet Qty	Approx. Weight
--------------	-------------	------------	----------------

ASDC30015SP	Chamber with 110mm or 160mm main inlet and outlet and 2 x 110mm side outlets. (Supplied with square section - A15 loading access cover).	7	13
--------------------	--	---	----

Overall Depth with cover - **1465mm**
Inlet Invert - **1225mm**

ASDC300B	Base unit only. Comes with 110mm or 160mm main inlet and outlet and 2 x 110mm side distribution outlet	18	4.5
-----------------	--	----	-----

Overall Depth - **604mm**
Inlet Invert - **374mm**

Access Cover

A square section A15 Loading access cover is supplied with the ASDC30015SP and can be supplied separately.

300ACSR	355mm - Square lockable access cover- A15 loading	60	3.5
----------------	---	----	-----

Access Shafts & Couplings

Overview

For deeper chambers and for chambers where shafts may need to be supplied separately, we provide a range of factory finished access shafts. These shafts are cut and trimmed in our factory, ready for use and come in 1000mm, 1500mm & 2000mm lengths. These access shafts are available for all our chamber diameters (As detailed below).

We provide a range of couplings for these shafts, to connect to existing chambers. Couplings can be provided with, or without seals.

These access shafts are also ideal for use as shuttering for road signs, and posts and when filled can be used as an effective barrier for restriction to site entrances.

	Product Code	Description	Approx. Weight
300 SERIES	300AS1	300 SERIES access shaft - Length 1000mm	5
	300AS15	300 SERIES access shaft - Length 1500mm	7.5
	300AS2	300 SERIES access shaft - Length 2000mm	10
	300DC	300 SERIES shaft coupling	1.5
	300SR	Sealing ring for coupling (2 required per coupling)	1.5
	450 SERIES	450AS1	450 SERIES access shaft - Length 1000mm
450AS15		450 SERIES access shaft - Length 1500mm	16.5
450AS2		450 SERIES access shaft - Length 2000mm	22
450DC		450 SERIES shaft coupling	5
450SR		Sealing ring for coupling (2 required per coupling)	2
600 SERIES		600AS1	600 SERIES access shaft - Length 1000mm
	600AS15	600 SERIES access shaft - Length 1500mm	27
	600AS2	600 SERIES access shaft - Length 2000mm	36
	600DC	600 SERIES shaft coupling	12.5
	600SR	Sealing ring for coupling (2 required per coupling)	3
	750 SERIES	750AS1	750 SERIES access shaft - Length 1000mm
750AS15		750 SERIES access shaft - Length 1500mm	42
750AS2		750 SERIES access shaft - Length 2000mm	56
750DC		750 SERIES shaft coupling	18
750SR		Sealing ring for coupling (2 required per coupling)	6
1050 SERIES		1050AS1	1050 SERIES access shaft - Length 1000mm
	1050AS15	1050 SERIES access shaft - Length 1500mm	78
	1050AS2	1050 SERIES access shaft - Length 2000mm	104
	1050DC	1050 SERIES shaft coupling	30
	1050SR	Sealing ring for coupling (2 required per coupling)	9

General Installation Guidance

Landscaped

Non - trafficked - pedestrian loading only

For Catchpits the sump will need a minimum 150mm sub base and surround, which dependent on ground conditions, will be either, granular bedding material or . . . in high water tables, we advise a 150mm thick concrete base

Final installation of cover slab etc, should be agreed with the design engineer. Details of advised inspection chamber installations can be found in - DCG - Design & Construction Guidance and Section H of Building Regulations

Driveway

Light - traffic/cars - 1.5 tonne wheel load - A15

Trafficked

Vehicles to 40 tonne wheel load - D400

PCC Manhole

Using Accesso chamber base

Accesso chamber base
Model shown AIC600300B, which accommodates 300mm twinwall
