

# SYLVARED

## STRIPBOARD

**14 & 22 MM**

Beech is one of Europe's most common hardwood species and the excellent strength properties together with a uniform structure make beech very suitable for floors. The warm reddish glow is achieved by means of colouring the wood throughout in combination with a slightly toned surface. This makes Sylvared an interesting alternative to exotic wood species.

Junckers solid hardwood flooring is produced and categorized in accordance with EN 13629, EN 14342 and Junckers own factory standard. The floors are made exclusively from solid hardwood and the photographs illustrate the colour, knots and structural graining variation characteristic for the specific wood species and grade. Each photograph shows the average appearance of the grade. It is normal to see a variation in appearance between individual boards, staves and floors produced and installed at differing times. Up to 5% of the staves may contain features of the next style.

Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.

## TECHNICAL INFORMATION

THICKNESS X WIDTH: 14/22 X 129 MM

### STYLE CHART B 2.3 - B 3.3

#### SYLVARED CLASSIC

This grade has a uniform look with very little colour and structural graining variation between the individual staves. Only few small knots and very fine hairline splits occur.

#### SYLVARED HARMONY

This grade has a natural look where the share of heartwood adds a more distinct colour and structural graining variation between the individual staves. Medium sized knots and fine hairline splits occur to some degree. Knots and other irregularities are factory filled with a one colour filler.

#### SYLVARED VARIATION

This grade has a rustic look with substantial colour and structural graining variation between the individual staves. Several small and large knots and fine hairline splits occur. Knots and other irregularities are to the greatest extent possible factory filled with a one colour filler.
