## SOLID HARDWOOD FLOORING

**14 & 22 MM**

Black Oak is from ancient times known as one of nature's own products made of oak stored submerged in a bog for centuries. Natural processes cause the oak almost to become black and this characteristic colour gives the wood a very authentic expression. Through a unique colouring technique Junckers has recreated this look and together with the excellent strength properties of the oak a very exclusive product for floors is achieved.

Junckers solid hardwood flooring is produced and categorized in accordance with EN 13629, EN 14342 and Junckers own factory standard. The floors are made exclusively from solid hardwood and the photographs illustrate the colour, knots and structural graining variation characteristic for the specific wood species and grade. Each photograph shows the average appearance of the grade. It is normal to see a variation in appearance between individual boards, staves and floors produced and installed at differing times. Up to 5% of the staves may contain features of the next style.

Hardwood floors may fade and change colour over time, especially when exposed directly to sunlight.

## TECHNICAL INFORMATION

THICKNESS x WIDTH: 14 & 22 x 129 MM

### BLACK OAK STRIPBOARD HARMONY

This grade has a natural black look with some colour and structural graining variation between the individual staves. Lighter tones of colour can be seen along the grain pattern and in the sapwood. Medium sized knots and fine hairline splits occur to some degree. Knots and other irregularities are factory filled with a one colour filler.

### BLACK OAK STRIPBOARD VARIATION

This grade has a rustic black look with substantial colour and structural graining variation between the individual staves. Extensive areas with lighter tones of colour can be seen along the grain pattern and in the sapwood. Several small and large knots and fine hairline splits occur. Knots and other irregularities are to the greatest extent possible factory filled with a one colour filler.
