#### Smooth flange

Function	EPDM MULTIPLEX COLLARS are used to connect EPDM synthetic felts to any through tubes or systems on the roofing. The shank is designed to be used with tubes of various diameters and shaped with a slight taper that facilitates its installation. The smooth flange for excellent bonding with adhesive to EPDM synthetic felts. They are 100% compatible with prefabricated EPDM synthetic felts.		
Compatibility	They are compatible with prefabricated EPDM felts		
Range	DN 10 - DN 12 - DN 30 - DN 40 - DN 63 - DN 75 - DN 80 - DN 90 - DN 100 - DN 110 - DN 125 - DN 140 - DN 160 - DN 200		
Performance	The elastic material they are made with ensures longterm watertightness. They provide excellent resilience to deterioration caused by the sun, ozone and other weather agents or chemicals normally found in the atmosphere. The elasticity of the material allows for excellent flexibility even at low temperatures, which ensures mechanical and physical properties are maintained over time.		
Operating temperature	-20°C; +75°C		
Included accessories:	-	Recycled product	No
Optional accessories:	Band in stainless steel	Recyclable product	Yes
	-	Material	EPDM
	-		
	-		
	-		

#### Additional information

We recommend thoroughly cleaning the collar and felt near the area where the connector will be glued.  
For a better understanding of the interaction between the Collars and the accessories, please refer to the respective technical data sheets.

If not otherwise indicated, all measurements are expressed in millimetres.

#### Flange with holes

Function	<p>TPE MULTIPLEX COLLARS are used to connect the waterproof bituminous felts to any through tubes or systems on the roofing.</p> <p>The shank is designed to be used with tubes of various diameters and shaped with a slight taper that facilitates its installation.</p> <p>The perforated flange favours gas welding with bituminous sheaths.</p> <p>They are 100% compatible with APP and SBS prefabricated bituminous membranes and bituminous coats. A sandwich installation between the two layers of membrane is recommended to achieve top performance.</p>		
Compatibility	They are compatible with APP and SBS prefabricated bituminous felts and bituminous coats.		
Range	DN 10 - DN 12 - DN 30 - DN 40 - DN 63 - DN 75 - DN 80 - DN 90 - DN 100 - DN 110 - DN 125 - DN 140 - DN 160 - DN 200		
Performance	<p>The elastic material they are made with ensures longterm watertightness. They provide excellent resilience to deterioration caused by the sun, ozone and other weather agents or chemicals normally found in the atmosphere.</p> <p>The elasticity of the material allows for excellent flexibility even at low temperatures, which ensures mechanical and physical properties are maintained over time.</p>		
Operating temperature	-20°C; +75°C		
Included accessories:	-	Recycled product	No
Optional accessories:	Band in stainless steel		
	-	Recyclable product	Yes
	-	Material	TPE
	-		
	-		

#### Additional information

To improve gas welding, a thin coat of primer can be applied on the drain connectors beforehand.

For a better understanding of the interaction between the Collars and the accessories, please refer to the respective technical data sheets.

If not otherwise indicated, all measurements are expressed in millimetres.
