INNOLINE® VERGE

BENEFITS

Weathering & Durability: Does not rust, rot, or become brittle over time. Features excellent UV resistance and colour retention properties due to a colour pigment and resin impregnation process that «stains» the colour directly into the material.
Compact Core Technology: Manufactured using the same advanced process as INNOLINE roofing sheets. It is made from high-quality cellulose fibres tightly compressed into a dense structure and heavily saturated with bitumen.
Perfect Aesthetic Match: It is designed with the same material, texture, and color options as INNOLINE roofing sheets (giving a clean, cohesive tile-effect finish).
Lightweight: Extremely light and easy to handle, meaning it can safely be installed by a single person

TECHNICAL CHARACTERISTICS

Material	Composite material made of recycled cellulose fibres, bitumen, thermosetting resin and inorganic pigments
Item Length (cm)	100
Item Width (cm)	15
Item Thickness (mm)	2,15
Item Surface (SQM)	0,15
Mean Net Weight (kg)	0,42

MECHANICAL & PHYSICAL PROPERTIES

INSTALLATION

Installation Recommandation	Special conditions of installation are required. Refer to the installation guide. Limitations: Not for roofs of extensive animal breeding farms or cladding applications.
Handling Recommandation	Recommended Protective equipments (PPE): Safety Shoes (SBP, SP1, S3), Mechanic Gloves, Eye Protection equipment (safety glasses)
Disposal Information	Residue code : 170302 (bituminous mixtures other than those mentioned in 170301)

No DOP Required
