

Reflective Membrane Lap Tape

For use in Novia® MirrorWrap W1 installations

Novia® Reflective Membrane Lap Tape (RMLT) is a reflective, edge and lap jointing tape suitable for use with **Novia® MirrorWrap W1** reflective breather membrane applications. **Novia® RMLT** is a metallised polyester tape coated with a high performance cold weather solvent acrylic adhesive. It is a self wound tape with no release liner. **Novia® RMLT** is a low emissivity tape which should only be used in addition to **Novia® Double Sided Lap Tape (DSLST)**, for a high specification and fully reflective finish for **Novia® MirrorWrap W1** installations. For best results an installation temperature of +5°C is recommended.

An example installation for Novia® MirrorWrap W1

Available roll sizes:
60mm x 50m

Installing Novia® MirrorWrap W1

For a fully reflective seal, we recommend the use of **Novia® Double Sided Lap Tape (DSLST)** and **Novia® Reflective Membrane Lap Tape (RMLT)**. The use of **Novia® DSLT** will greatly improve the final installation quality by improving the performance and overall airtightness of the structure, reducing wind chatter and allow for any unexpected damage to be repaired quickly. We offer **Novia® DSLT** for use between laps, in high specification work where there is an emphasis on air-tightness.

Nominal Technical Data

	Value	Units
Roll Width	60	mm
Roll Length	50	m
Roll Weight	0.25	kg
Thickness	55	micron
Tensile Strength	3000	N/M
Elongation	100	%
Service Temperature	-30 to +100	°C
Installation Temperature	Recommended +5 °C
