THE UK RAT PROBLEM

WHAT ARE THE FACTS?

The rat population is thriving in our modern urban habitat. A rat infestation can not only be extremely difficult to remove, it can also cause high levels of damage and distress.

How many rats are there in the UK?

It is estimated that there are over **10 million** brown rats in the uk.

The rise of the Super Rat!

It is estimated that **70%** of the UK rat population has become resistant to conventional poisons.

Rats can spread disease?

Rats transmit diseases that affect humans. They produce up to **40 droppings** a day as well as frequently marking with urine.

Powerful jaws and strong teeth

Rats have a natural desire to gnaw. They can easily chew through wood, plastic, wiring, bricks and mortar

PREVENTION IS BETTER THAN CURE

Rats often gain entry to a property through damaged or disused sections of waste pipe.

Ratgate helps prevent the entry or re-entry of rats from the sewer system.

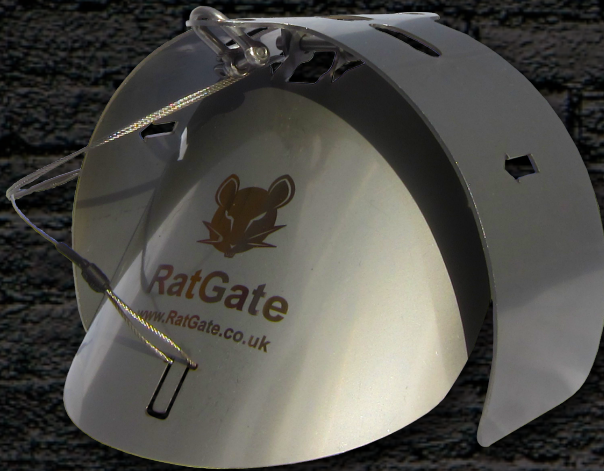

RatGate is available in three sizes to meet the requirements of all commercial and domestic properties

4" (110mm)

Suitable for: most modern Domestic properties.

6" (160mm)

Suitable for: Legacy sized pipework

9" (225mm)

Suitable for: Legacy sized pipework
