SOUDAL

Technical Data Sheet

Roof & Gutter Sealant

Technische gegevens:

Base	Bituminous elastomer
Consistency	Stable paste
Curing system	Physical curing
Skin formation	Dust free within 20 minutes
Shrink	Approx. 11%
Specific gravity	Approx. 1,1g/mL
Temperature resistance	-35°C to +130°C
Maximum allowed distortion	10%

Product:
Soudal Roof & Gutter Sealant is a superior plasto-elastic, single component sealant based on bitumen.

Characteristics:
- Very good adhesion to many building materials, especially bituminous surfaces
- Good adhesion, even under water
- Very easily toolable
- High slump resistance (does not sag)

Application areas:
- joints with a movement up to 10%
- repair of leaks in roof-coverings and -gutters, drainpipes,…
- ideal as an adhesive for all types of roof coverings (except EPDM-based materials)
- emergency repairs of sealants, also in rainy conditions

Packaging:
Colour: black
Verpakking: cartridge 310mL

Shelf life:
12 months in its original and unopened packaging and stored in a dry, cool place between +5°C and +25°C.

Surfaces:
Type: all usual building materials, especially bituminous substrates
Condition: clean, free of dust and grease, may be wet
Preparation: not necessary

A preliminary compatibility test is always recommended.

Joint dimensions:
Minimum width: 5 mm
Maximum width: 10 mm
Minimum depth: 5 mm
Recommended: depth = width

Applying the sealant:
Application: using a manual or pneumatic caulking gun
Application temperature: +1°C to +30°C
Clean: with Soudal Fix All Cleaner or water immediately after use. After curing, the product can only be removed with Soudal Sealant Remover or Soudal Industrial Cleaner.
Finishing: with a soapy solution before skin formation
Repair: with Soudal Roof & Gutter Sealant

Safety precautions:
Apply the usual industrial safety measures. Consult the label for more information.
