

Datasheet: TS62 Certified FR Debris Netting

Product Specification

Roll Sizes:	2m x 50m
Weight:	60 gsm (+/- up to 5%)
Construction:	High Density Polyethylene Monofilament knitted yarn
Eyelets:	2m Top, Middle & Bottom (3no)
Spacing:	Eyelets at regular intervals on each band
Tensile Strength:	Warp: 400 N/50mm Weft: 245 N/50mm
Air permeability	40%
Shade factor	30%
Colour:	Blue (with 2no x 25mm continuous Red bands).
Certificate no:	Certificate of approval No CF 5764 Complies to BS7955

Environmentally friendly – Chemically inert, and harmless to the environment

Product Packaging Specification

Products packaged as individual rolls, in polythene bags.

Approval No CF 5764

Recommended Installation

The scaffold framework must be designed by a competent person, to all relevant codes of practice and applicable standards, the design must take into account the increased load factor caused by the debris netting.

Debris netting is designed to be fixed to the outside of the scaffolding framework, using cable ratchet ties, achieving a fixing pattern of approximately one cable ratchet tie per metre in each direction.

Debris netting should only be installed by a competent person, once a full risk assessment has been carried out.
