## Universal Slurry Primer

An easy to use, polymer enhanced cementitious primer for all types of external Porcelain & Natural Stone

- 
- ✓ *Exceeds the requirements of BS 7533-101:2021*
  - ✓ *Creates an exceptional bond between bedding and all types of paving*
  - ✓ *Easy to mix and apply*
  - ✓ *Brush applied*
  - ✓ *Long working time, 2-3 Hours depending on temperature*
  - ✓ *Helps eliminate efflorescence and picture framing in natural stone*

# ULTIMATE

## Application of Universal Slurry Primer

### IMPORTANT

**Before Starting** - Ensure temperature is at least 5°C. Never prime at less than 5°C or if frost or rain is forecast.

**Required PPE** - Product contains cement, wear a dust mask and safety glasses.

**Tools You Will Need** - A drill and suitable mixing paddle, stiff paint brush and a measuring jug.

### DIRECTIONS FOR USAGE

Please read carefully.

1. In a mixing tub, pour the desired amount of water, and gradually mix in the powder.
2. Use your drill and mixing paddle to mix at a low speed until you attain a smooth, lump-free creamy texture. Allow it to stand for 2 minutes, then mix again to ensure thorough mixing of all polymers into the slurry.
3. Using your brush, carefully cover the back of your slab, ensuring a uniform 2mm coating extending all the way to the edges.
4. Promptly clean off any slurry present on the face or side of the slab by using a sponge and clean water.
5. Lay the slabs promptly after applying the primer. Should not be used on polished surfaces.

Coverage  
Approx. 20m<sup>2</sup>  
Per Bag

20kg

**Storage:** Should be stored indoors, in dry conditions, off the ground.

**Shelf Life:** 8 months in original unopened packaging, if stored between 5-30 degrees.
