Greenstar 8000+

The big-time boiler

For your biggest customer homes and the busiest family schedules. The Greenstar 8000+ can handle high hot water and heating demands, with ease of installation, maintenance or serviceability for you. With rear piping, pre-plumbing jig, large condensate siphon and keyless filling link for combis – this is a heavyweight boiler with a lightweight workload.

Greenstar 8000+ Style

Top class boiler

For the busiest mornings and the biggest family homes, the Greenstar 8000+ Style lives up to the most stylish of homes with its stunning contemporary design. A powerhouse able to cope with bustling schedules, but with rear piping, pre-plumbing jig, large condensate siphon, and keyless filling link – this is a boiler that can do it all, without taking up all your time.

Why install the Greenstar 8000+?

Powerful
32kW – 50kW outputs at 1.2 – 1.8 bar for 100% flow

SimpleSwitch
Easy switch-out from a CDi classic

Modern design
Clean design for modern homes

Improved display
Full colour display with backlit touch buttons

Convenient
Intelligent Filling System available for combi

Easy installation
Installer-friendly servicing and maintenance

Why install the Greenstar 8000+ Style?

8000+ with extra features:

Stunning style
Glossy black finish and dotted design

Matching design
Stylish silver flues to complement the boiler

Power
32kW & 36kW combi available in NG outputs

Style and substance

Front cover

- ▶ Reinforced steel front cover available in high gloss black (Style only)
- ▶ Easy to remove with just one screw

Control key

- ▶ Industry first 'RF Key' receiver links time and temperature controls to the boiler
- ▶ Enables you to fit our Greenstar Comfort+ II RF and Bosch EasyControl with ease

Top and side panels

- ▶ No further screws needed for internal access thanks to removable top and side panels
- ▶ With the casing removed, the boiler can be lifted easily with two large handles
- ▶ Its open structure allows for easy access to the hydraulic block

Pressure gauge and sensor

- ▶ Digital gauge featured on the boiler control display
- ▶ Pressure can be monitored during installation and maintenance even when the power is off
- ▶ High quality pressure sensor and pressure monitoring logic ensures no disruption

Condensate trap and front access PRV

- ▶ The large capacity trap increases the volume of condensate discharge, reducing the risk of freezing
- ▶ Drain down the boiler without connecting to an external drain-off hose
- ▶ Front access PRV can be removed in less than 10 minutes

Hydraulic and wiring

- ▶ Control fascia can be quickly dropped for comfortable service access
- ▶ Wiring connections accessible without any screws, laid out similar to our Greenstar 4000
- ▶ Built-in screwdriver holder and screw tray for added convenience

Greenstar 8000+ & 8000+ Style Controls

Bosch EasyControl

- ▶ Smart, internet connected programmable control
- ▶ Can be installed wirelessly with the Greenstar 8000+ range
- ▶ DHW and CH can be programmed, monitored and controlled via the Bosch EasyControl app
- ▶ Decide heating times and temperatures for individual rooms with our smart Bosch TRVs*
- ▶ Store your details directly into the app, so your customer can contact you when they need to
- ▶ Smart integrations with Amazon Alexa, Siri shortcuts, and IFTTT
- ▶ Available in black or white so customers can match to their boiler

Comfort+ II RF

- ▶ Wireless room thermostat with backlit display, push-buttons and dial
- ▶ Load Compensation for enhanced efficiency
- ▶ Landlord function
- ▶ All-in-one time and temperature control – perfect for boilers that are not easily accessible
- ▶ Low pressure indication
- ▶ Six adjustable heating and hot water time periods using our easy to use menu
- ▶ Compatible with our Comfort+ Wireless Outdoor Weather Sensor

Comfort+ I RF

- ▶ Wireless room thermostat with clear display and simple dial adjustment
- ▶ Plug-and-play installation
- ▶ Pre-paired wireless room thermostat and RF key receiver
- ▶ Load compensation for enhanced efficiency

Greenstar 8000+ & 8000+ Style The inside story

Separate combustion cover (not shown) allows other servicing steps to be completed without seal disturbance

10L Expansion vessel

Fan delivers high outputs and a max flue length of up to 17m (60/100mm, horizontal)

Pressure gauge to support initial fill

Front-facing PRV for ease-of-access

Large volume siphon minimises likelihood of frozen condensate

Easy-to-remove side panels reduce lift weight

Combined drain-off and condensate supports straightforward boiler drain-down

Range rating the max CH output (down to 50%) for smaller, well-insulated properties

Keyless filling link (not shown) provides homeowners with a simple method of system pressure top-up

Easy-to-service C5 Heatcell known for its robustness

Green touchpoints enhance intuitive component interaction

Robust UMP 4 pump

Screen display
Intuitive, clear colour display is easy to use and control.

* Installing smart TRVs will enable weather compensation mode.

Greenstar 8000+ & 8000+ Style

Technical drawings

Dimensions (mm)

Clearances (mm)

Maximum flue lengths (mm)

* Height for either 60/100 flue or 80/125 flue. ** 20mm from a removable cupboard door. 450mm from a fixed surface for servicing. Same clearances for ventilated and unventilated compartments.
