

COROTILE - DIMENSIONS

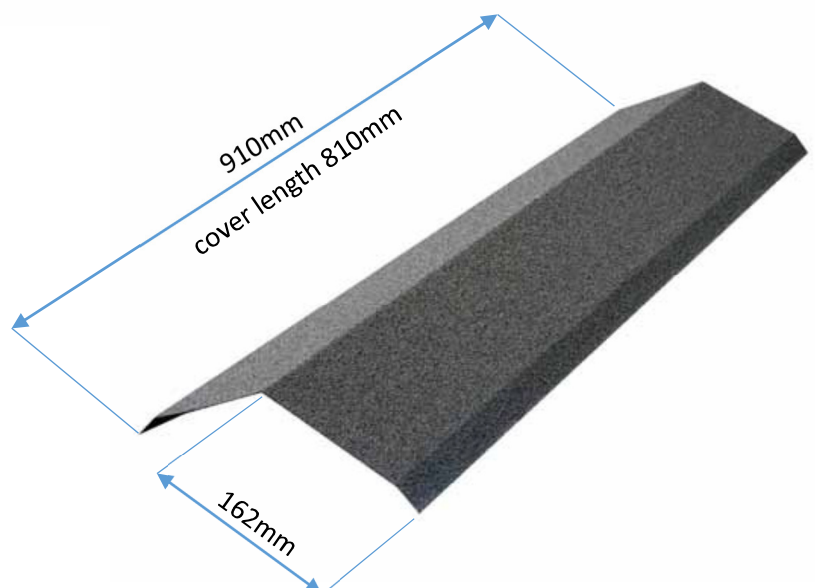

PANEL - CTPANEL

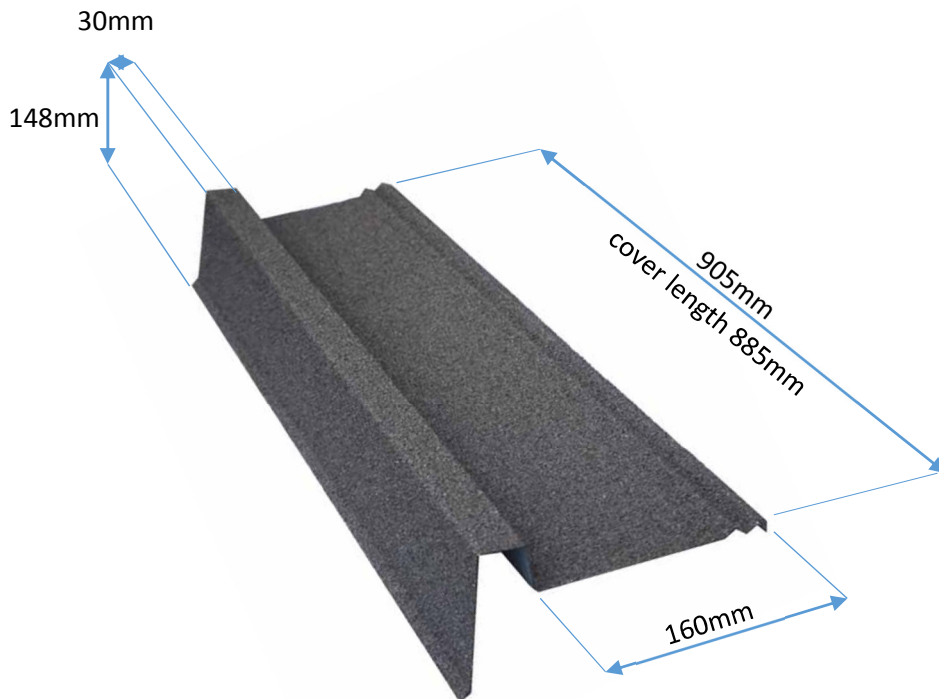

Corotile is made from steel sheet encased in acrylic and natural stone chippings. It is designed to be overlapped rather than cut to protect the steel sheet. If the sheet does need to be cut, it is important to seal the cut with a propriety paint such as Hammerite.

RIDGE PIECE - CTRIDGE

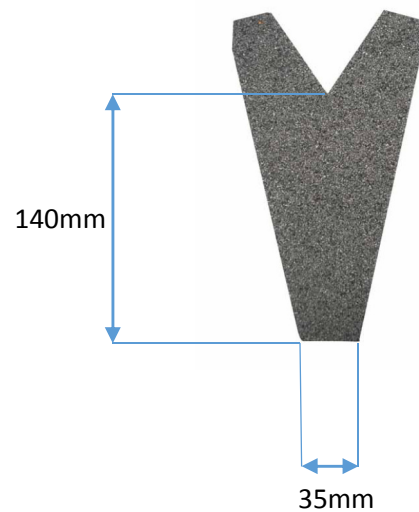

The ridge is a flexible piece which can flex to suit the pitch of your roof.

BARGE BOARD - CTBARGE

END CAP - CTCAP

FIXINGS - CTFIX

Screws and washers in packs of 10. We recommend 9 fixings per panel, 3 fixings per barge board, 4 per ridge and 1 per end cap.
