Beautiful and environmentally friendly Hyperion Cladding
provides the perfect combination of

QUALITY & SUSTAINABILITY

Lasting, low maintenance enjoyment
for years to come.

HYPERION CLADDING BENEFITS

Hyperion Cladding is engineered from an innovative composition of 60% recycled wood (FSC® 100% certified) and 40% high density recycled Polyethylene with environmentally gentle additives to help bonding and colour. This mixture of material makes Hyperion Cladding superior to traditional wooden products.

Highly Durable

The boards do not rot, warp, split, or splinter

Low Maintenance

The boards never need to be stained or treated

Looks Great

The boards effortlessly withstand the elements

Long Warranty

15 years residential
10 years commercial

Quick Installation

Simple and seamless installation systems

Up To Class B Fire Rating

Class B Sentinel cladding
Class D Pioneer cladding

The background of the image is a close-up of a building's exterior wall. It features horizontal, light-brown or tan-colored slats that create a rhythmic, textured pattern. A window with a dark frame is partially visible, showing a glimpse of the interior and the sky. The lighting is bright, casting soft shadows and highlighting the texture of the slats.

SIMPLE INSTALLATION

Hyperion Sentinel Cladding boards are installed with a quick and easy hidden fastener system.

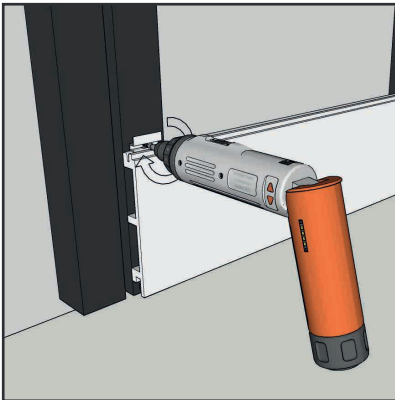

Simply fix the fasteners to the substructure and clip in the boards.

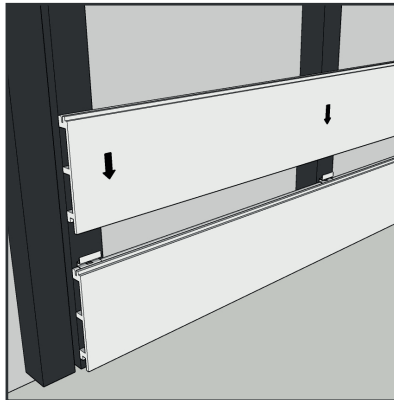

1 Fix the starter fasteners to the bottom edge of your battens

2 Slide the first board into the fasteners

3 Install hidden fasteners to fit the next board in place

4 Slide the next board and repeat

EDGE BOARD

£5.49 (+VAT) PER METRE

- 54 x 54 mm profile – 2.5 m lengths
- Matching colours available
- Perfectly flush finish with Hyperion edge boards

CORNER TRIM

£2.99 (+VAT) PER METRE

- 54 x 40 mm profile – 2.5 m lengths
- Matching colours available
- Create the perfect corner with Hyperion nosing trim

FASCIA BOARD

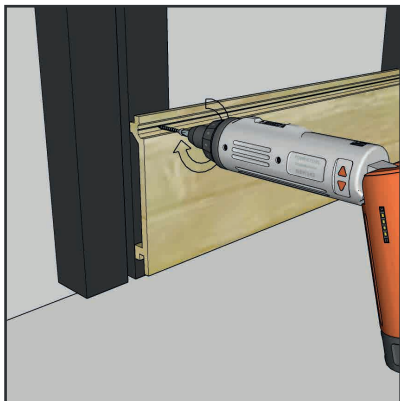

£3.75 (+VAT) PER METRE

- 72 x 12 mm profile – 2.5 m lengths
- Matching colours available
- Effortlessly conceal gaps with Hyperion fascia boards

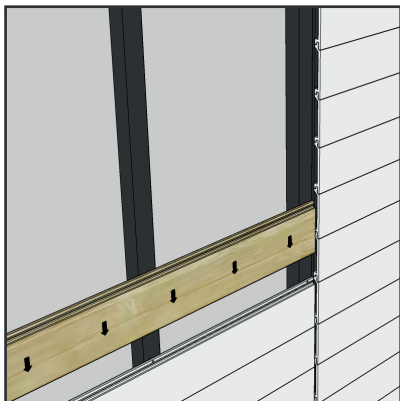

SIMPLE INSTALLATION

- 1** Pre-drill oversized holes & fix with screws to the substructure

- 2** Clip in the second board to the groove of the first board

- 3** Repeat, making sure to shape boards around openings

- 4** Attach finishing fascia to conceal top groove

Easily installed onto timber or plastic battens, simply pre-drill oversized screw holes and fix using standard A2 grade stainless steel screws.

Hyperion Pioneer Cladding boards contain a hidden shiplap system leaving your cladding with a flush finish.
