

Telescopic Under Floor Void Ventilator

CODE **G960**

VIEW ON A

Description:

The G960 Telescopic Under Floor Void Ventilator is designed to provide a clear airflow passage to the void underneath a suspended floor.

The telescopic feature enables the G960 to adjust vertically between three and five brick courses although a G961 Vertical Extension Sleeve is also available for further multiples of two course adjustments as required.

The rear of the vent features a rodent grille consisting of evenly spaced slots specifically sized to prohibit entry of rodents and building debris which could block the vent.

The front aperture is able to take a G930 Combination Airbrick or a clay airbrick albeit with a reduced airflow.

COLOURS	Black
PACKING DETAILS	Packed in 20's per cardboard box.
WEIGHT	9.2kg per box
