## Safe tiles

The possible uses for safety tiles are wide and diverse. All applications have to protect against injury as well as safeness. Safe tiles are ideal floor coverings for all playgrounds, recreational areas and kindergartens and can be designed in a multitude of shapes and forms. Whether you need protection for falling children, anti-slip properties around swimming pools or shock absorption in ball playing games, safety tiles are the right choice. The different product shapes and colour variations offers a flexible and individual design ideas. Safety tiles conform to the safety requirements of EN 1177 and are categorized according to the critical fall height values.

### Advantages:

- easy installation
- high safeness
- good values for critical fall height
