

Solatube diffusers

Solatube ceiling diffusers are highly efficient at diffusing the bright light transferred through the tubing. There are no visible fixings. Choose from three attractive diffuser options.

OptiView® – Standard for all models.
Gives a spectacular clear view

Prismatic – Optional on 250 and 350mm Solatube models

Frosted – Optional on 250 and 350mm Solatube models

Solatube roof flashings

With Ubbink, you can be sure of getting the right flashing kit for your installation. Simply tell us your roof type when you place your order

Fixtures and fittings included

All Solatube systems come with everything you need for installation – sealants, seals, screws, and full installation instructions. There are no hidden extras – **but please remember to specify the number of extension tubes you'll need.**

Note: picture shows standard 250mm base kit with additional 610mm long Spectralight® Infinity extension tube.

*Included in Basic Kit - dome, flashing (please specify roof finish when ordering), two 30 degree adjustable bends, ceiling diffuser and ceiling trim.

Solatube optional extras Versatile three-in-one solutions

Electric light kit

This kit fits neatly inside the 250mm and 350mm systems.

Extractor fan kit*

Designed to integrate with the 250mm Solatube. It's a brilliant idea for bathrooms and shower rooms.

Daylight dimmer kit

Electrically operated, it controls the amount of light entering a room.

Angle adaptor – 0-90°

Allows easy installation around roof-space obstructions and corners.

Solatube's innovative options allow you to offer additional functions and at the same time reduce ceiling clutter.

It means you can light and ventilate a room using the same ceiling fitting, day and night.

Optional extension tubes (610mm long)

The following chart gives the required number of extension tubes for the distance up to:

400mm (16")	0 tubes	2640mm (104")	4 tubes
960mm (38")	1 tubes	3200mm (126")	5 tubes
1520mm (60")	2 tubes	3760mm (148")	6 tubes
2080mm (82")	3 tubes	4320mm (170")	7 tubes

Natural daylight where it's needed

*The world's leading
tubular skylight system*

The simple way to bring daylight into dark or windowless areas

Solatube tubular skylight efficiently transfers daylight from the rooftop to internal areas of almost any building using super-reflective Spectralite® Infinity tubing. Independent testing by the Building Research Establishment confirms the efficiency of Solatube tubular skylights. (See *Measurements of the Transmittance of Light Pipes (tubular skylights) Under Overcast and Simulated Sunlit Conditions*, June 2003, BRE.)

Here's why you can't afford to fit anything else

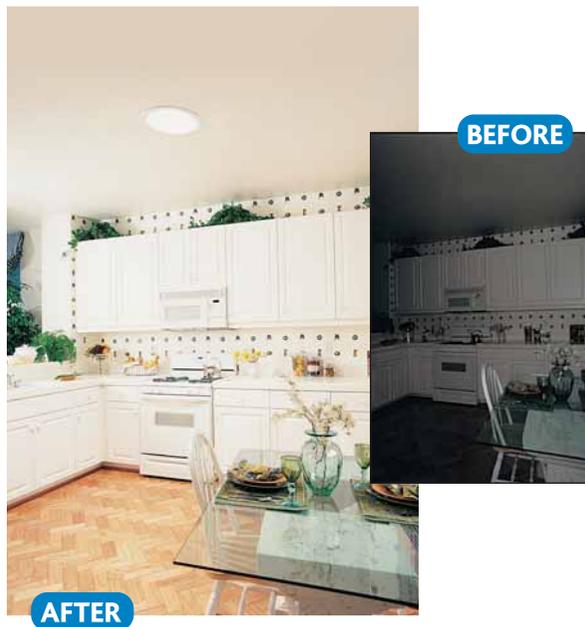

- Straightforward installation
- Maintenance-free
- Highly efficient performance
- Market-leading technology
- Unbeatable value
- 10-year guarantee against manufacturing defects

Solatube in the workplace

530mm diameter system

Designed for working environments, larger areas and applications requiring higher light levels, Solatube is a simple and cost-effective natural lighting solution for offices, retail outlets, healthcare and education premises. Dark warehouse and factory units can also be transformed. Solatube offers unrivalled performance and is designed to fit into suspended ceiling grids, drywall ceilings or factory structures.

For commercial applications, a round-to-square transition box allows Solatube to be fitted to suspended ceilings or match to existing electric lighting systems.

Solatube in the home

250/350mm diameter systems

Natural light not only improves the quality of life, it can also increase the value of a home. Solatube transforms dark, windowless areas and brings them to life. Available in two sizes, a Solatube is brilliant for any room:

- Kitchens
- Extensions
- Loft conversions
- Bathrooms
- Shower rooms
- Bedrooms
- Cloakrooms
- Hallways
- Landings
- Stairwells
- Utility rooms
- Living rooms

Solatube can be installed in any roof type, flat or pitched, and most types of ceiling including vaulted and cathedral.

Solatube's three-in-one solution is brilliant in bathrooms.

Solatube from Ubbink... ...naturally brighter by design
