# UB11 Vepac Vent for Slate.

## KEY FEATURES

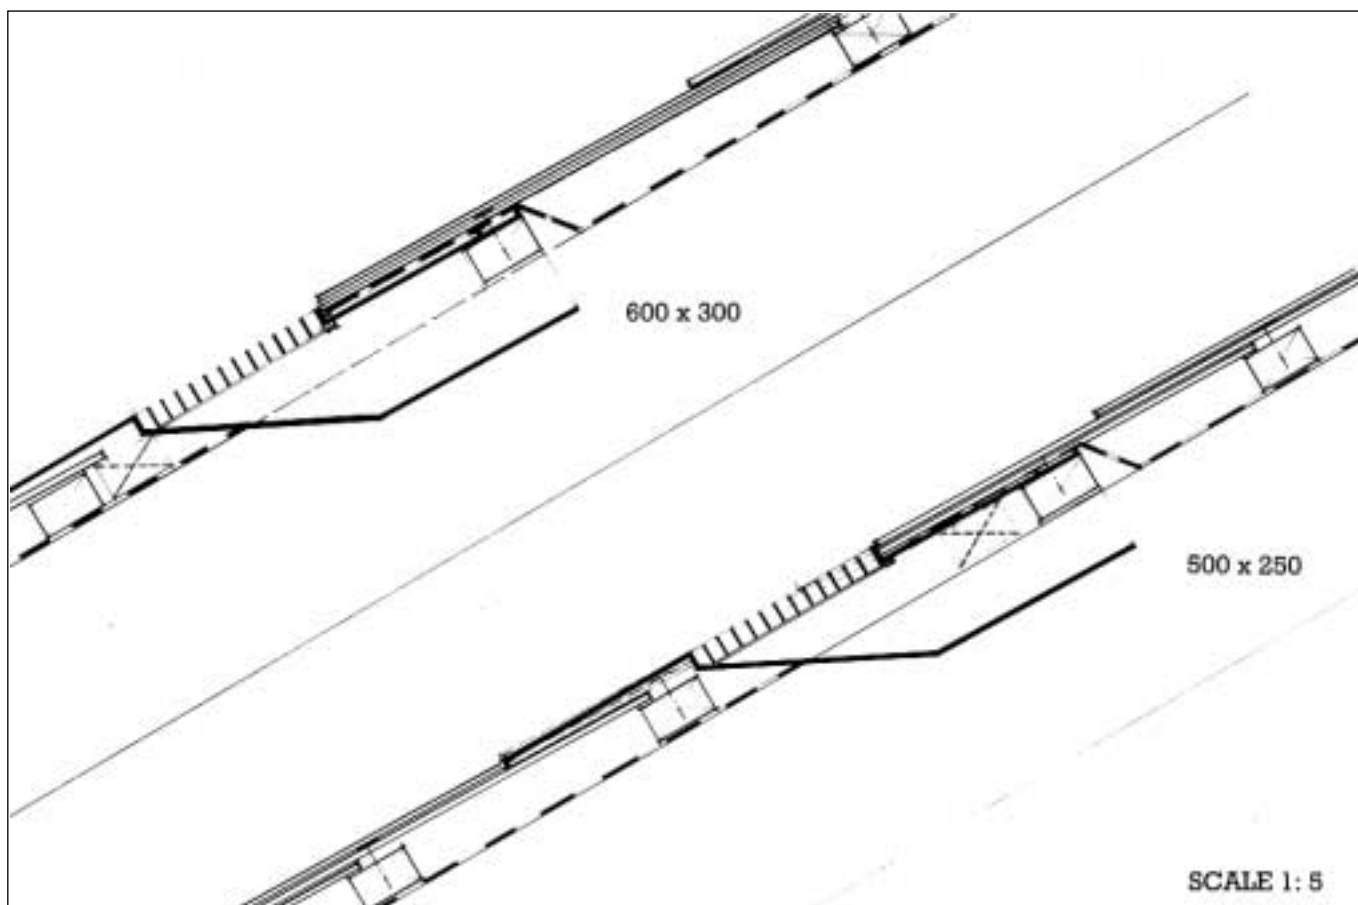

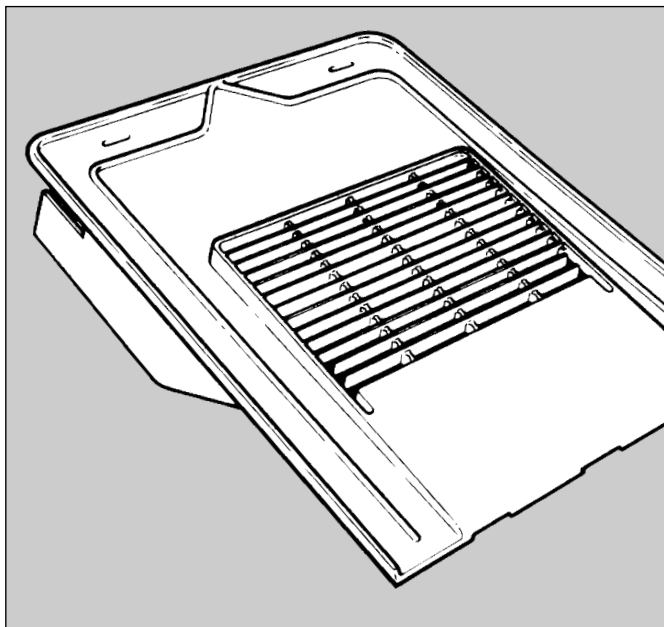

- A unit which is simple to install.
- Economically priced.
- Impressive free vent area.
- Discreet and aesthetically pleasing.
- Mesh to inhibit large insects.

Suitable for high or low level venting - some low profile units are only capable of letting air out and can therefore only be used at high level. UB11 is both an air inlet and outlet unit. It can be installed in any size of slate with the minimum of batten and slate trimming, blending into the roof finish so as to be barely visible.

A matching terminal for soil and vent or mechanical extract is available coded UB39.

## TECHNICAL DETAILS
