

The VELUX Blinds collection

1st February 2012

VELUX®

Take control of your indoor climate

Great things can happen when you incorporate light into the design of your home.

But inviting natural light into your living space is one thing. Managing it effectively is another.

Thanks to our latest selection of specially designed blinds you can take control of the amount of daylight a room receives. As well as its heat intake and heat loss.

This helps save energy and contribute to improving a room's indoor climate.

Our Blackout Blinds for example, can improve the insulation of a window by up to 20%. And our Awning Blinds can reduce the amount of heat entering a room by up to 90%.

There are a number of styles to choose from, each with a specific purpose. So, whether you're looking to soften the light or even block it out completely, you're in complete control.

Purchasing your VELUX Blinds and accessories

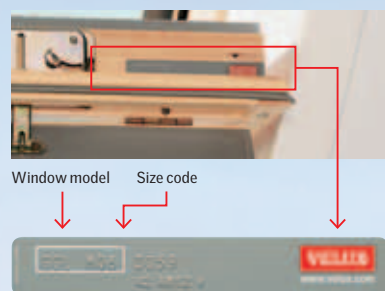

STEP 1

Check your window code

Every VELUX Roof Window carries a unique data plate that details the type and size of the window (see diagram below). Check your window's type and size. No measurements are needed.

Data Plate

This specifies both the window model and the size. In these examples the model is GGL, however, the size code varies depending on the age of your window – e.g. S06, 606 or 4.

STEP 2

Check your blind code

After you have chosen your blind type you need to establish its code. All codes are contained in this brochure on the swatch pages.

STEP 3

Purchase your VELUX Blind

You can order online at www.velux.co.uk/blindsdirect, alternatively, phone your order to the contact numbers in this brochure.

STEP 4

Can't make your mind up? Order your free swatches today

If you still can't make up your mind which VELUX Roof Window Blind is best for you, ask us for swatch samples to help you decide. We will be happy to deliver up to three FREE samples to your door. All you pay is £4.80 postage and packaging.

Ready Reckoner if window code is not known

Looking for a window code? Use this handy reckoner to locate your code according to window size.

Window Reference code (Pre April 2001 in brackets)	Internal Glass Dimensions (sizes in cms)

VELUX Blinds that are Pick&Click!™ compatible are Blackout Blinds, Roller Blinds, Pleated Blinds and Venetian Blinds.

Turn day into night

VELUX Blackout Blinds give the best total darkness for both night and day.

Perfect for afternoon naps and those lighter summer nights. Just right to ensure the kids get that deep sleep they need.

They'll keep you comfortable and improve the energy efficiency of your window too. Each blind can improve a window's insulation by up to 20%. They feature an outer aluminium foil that reflects excessive heat from the sun in summer. Equally, this helps retain welcome heat in winter.

Blackout Blinds Ideal for Bedrooms

IMPROVES
INSULATION
BY UP TO
20%

COLOUR
OPTIONS ON
PAGE 10
& 11

The key benefits

- Help to turn day into night
- Energy-efficient with aluminium backing as standard
- Reduces heat gain and heat loss
- Available in a wide range of colours and designs

Electric Blinds

We also offer Electric Blinds. Please note, Electric Blinds are recommended for electronically operated windows. See pages 38-41.

Remote Control Solar Blackout Blinds

SEE
COLOUR
OPTIONS ON
PAGE 10
& 11

The key benefits

- Operate the blind from anywhere in the room
- No wiring required, fitted in minutes
- Blind operated by a standard battery that is recharged by solar power
- Good for up to 600 operations (about a year's worth)
- Manual operation also possible
- Allows you to position the blind at any place in the window

Remote Control Solar Blackout Blind available for all window sizes. Just add £148.00 to the standard cost. Quote DSL to order.

(P19 CABRIO counts as 2 windows, a P04 and a P10. Please order blinds accordingly.)

White Line Blinds

White Line Blinds, with their white fascia and side channels, add the perfect finishing touch to our range of white polyurethane windows (GGU/GPU/GHU) and are available for an additional cost of just £10.00.

NEW

Blackout Blinds (DKL)

The new VELUX Blinds Collection from Karim Rashid

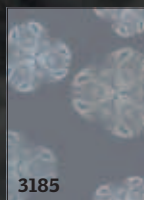

Award-winning designer Karim Rashid has created 8 visionary designs exclusively for VELUX.

Inspired by movement and nature, this contemporary collection offers inspiration and brings an abstracted 'digital nature' into the home. Blackout but eye-catching, colours range from vibrant pink to acid yellow, to a more subtle black and white, and four of the eight designs feature metallic detailing, creating a vivid texture.

(P19 CABRIO counts as 2 windows, a P04 and a P10.

Please order blinds accordingly.)

Remember you can create your own Duo Option Blind by adding an FPN Pleated Blind to any Blackout Blind. This option is available in all colours and for all window sizes.

Please note: As with all fabrics, the precise colours and patterns may vary from the printed samples.

Complete light control

VELUX Blinds give you so many options that you can choose between adjusting, dimming or simply softening the light in your room.

For complete light control, the Duo Blind is hard to beat.

You can have all the benefits of a Blackout Blind for increased energy efficiency and those occasions when you want to block the light out completely. Then again, you can enjoy the softer diffused light offered from a Pleated Blind.

Transform your home

Thanks to a VELUX Venetian Blind you can turn an ordinary room into a space of true beauty.

A kitchen, for instance, becomes the perfect combination of simple chic appeal and everyday practicality.

A bathroom, a haven of calm and tranquillity.

This popular range is the ideal solution, in fact, for any place encountering high levels of humidity.

The aluminium coating option helps regulate the temperature in a room. They can retain heat in the winter and reflect heat during the summer.

So, what are you waiting for? Let the transformation begin.

Looking good for your environment

Looking after the planet often begins at home. VELUX Energy Blinds are a great way to make your home more energy efficient. They combine the elegance of our classic pleated blinds with the insulating power of an aluminium coating, keeping heat in during winter and improving comfort and temperature. Sleek, with no visible cords they are the perfect addition to any room.

Energy Blinds (FHC)

The blind offers an optimal control of the daylight. Its cords are concealed in the double layer of fabric and the special sliding system allows you to position the blind smoothly and easily anywhere on the window. Blinds feature a unique design with super slim side channels and elegantly beveled corners. Available in 9 colours and patterns.

In the palm of your hand

It's the little comforts we add that make a house a home. Take our Electric Blinds for instance. With the simple touch of a button they can completely transform the light in a room.

They're extremely practical, too. If your windows are out-of-reach, in an extension or high up in a loft, they allow you to adjust the levels with ease. Giving you the extra comfort you've been looking for.

As you'll see, our Electric Blinds come in a variety of models. All of which put complete daylight control at your fingertips.

Electric Blinds (DML/RML/FML/PML)

Our Electric Blinds are recommended for electrically operated roof windows. They're available in all window sizes and in the following styles. When ordering, just add **£124.00** to the standard price and make sure you quote the correct Electric Blind code.

Please note: Electric Blinds are not available in the slimline design.

The key benefits

- Puts complete daylight control at your fingertips
- Can be operated from anywhere in the room
- No wiring
- Fitted in minutes
- Comes as a single package and includes remote control

Give flat roof windows a lift

Stylish, practical, easy to use.

When it comes to controlling the heat and light in a flat roof extension, look no further than our new Electric Flat Roof Blinds.

It's a Pleated Blind which, as well as providing basic protection from sunlight, comes in a range of colours and styles to complement your room.

And the best part of all? They're effortlessly controlled using a hand held remote.

Electric Flat Roof Blinds

Our Electric Flat Roof Blind is a Pleated Blind that is designed specifically for our new Flat Roof Window (CFP/CVP). It uses a remote control to regulate the heat and light levels entering the room.

The key benefits

- Provides basic privacy and greater control of sunlight at the touch of a button
- Elegant, soft, decorative effect
- 100% translucent cloth
- Wide range of colours and patterns
- Easy installation with our unique Pick&Click!® system

Conversion Kit (KUX 100)

Electric Blinds are recommended for electrically operated Roof Windows. If you'd like to use this blind on a Fixed Flat Roof Window (CFP) you will need a conversion kit (KUX 100).

This is an additional control system that allows FMG Pleated Blinds to be fitted to CFP Fixed version. It requires separate installation and power supply. Just add **£108.00**.

Solar Powered Awning Blind

NEW

Our new Solar Powered Awning Blind MSG is designed specifically for flat roof windows CVP and CFP. It uses a remote control to regulate the heat and light levels entering the room. Heat penetration in rooms with flat roof windows will be minimised significantly with this awning blind. MSG is easily fitted from the outside and is placed between the dome and the window. It is operated with the remote control supplied and compatible with other io-homecontrol® labelled products.

The key benefits

- Better indoor comfort
- No wiring required
- Easy assembly

REDUCES
HEAT GAIN
BY UP TO
90%

Awning Blinds

The way to beat heat

The key benefits

- Perfect for keeping a room cool
- Fabric is hardwearing and weather resistant
- Stops sunlight before it reaches the glass
- Keeps views free from obstruction
- Easy to install from inside your room

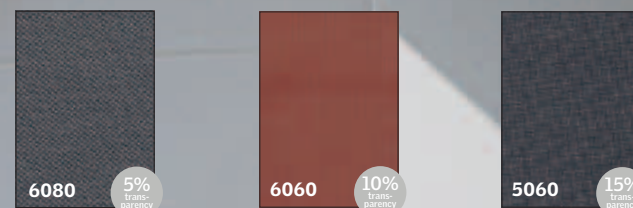

Operation

Available in manual, electric (for use with INTEGRA® Electric Roof Windows), and Solar (for use with Solar or manual Roof Windows).

Style

Our Awning Blinds are made of a hardwearing, dirt-resistant fabric. It's easy to clean with a damp cloth. Choose from three colours with three levels of transparency.

Please note: As with all fabrics, the precise colours and patterns may vary from the printed samples.

It's not just light we control

It's heat. And that's exactly where our attractive Awning Blinds come in. These unique external Blinds are ideal for keeping rooms cool and reducing the heat of the sun on hot summer days.

When closed, they can reduce the amount of heat entering a room by up to 90%.

The benefits don't end there. Their design also means they allow a pleasant diffused light to enter the room as well.

Each Blind is easily installed internally (so no need to get out onto the roof) and it rolls up out of sight under its casing when not in use.

Awning Blinds (MAL)

Current	1992-2001	Before 1992	Awning MAL
C02	102	n/a	£76.80

Electric Awning Blinds (MML)

Perfect for windows that are out of reach to open by hand, the Electric Awning Blinds puts heat control at your fingertips.

They can be fitted in minutes and can be controlled from anywhere in the room.

Electric Awning Blinds are recommended for electrically operated Roof Windows. For manually operated Roof Windows, choose a Solar Awning Blind.

Current	1992-2001	Before 1992	Awning MML
C02	102	n/a	£340.80
C04	104	6	£348.00

Solar Awning Blinds (MSL)

The Solar Awning Blind comes complete with a battery operated remote control. However, the batteries are recharged by solar power so you don't have to keep changing them.

It comes with a fully charged battery, which is good for up to 600 operations (about a year's worth) even if there's no sun for recharging.

Solar Blinds (MSL) are designed for manually operated Roof Windows. For electrically operated Roof Windows choose Electric Blinds.

Current	1992-2001	Before 1992	Awning MSL
C02	102	n/a	£448.80
C04	104	6	£456.00

Keep unwanted visitors at bay

Sometimes it's not just light that a window can let in. Have all your meals with your family in comfort. Enjoy a peaceful night's sleep. All without the unwelcome presence of insects thanks to the VELUX Insect Screen. It's installed on the wall so you can use your window as normal and benefit from ventilation and cooling. If you're not using it, simply roll it up in its aluminium casing. It can be combined with all types of VELUX Blinds.

Insect Screens (ZIL)

The key benefits

- Net is hidden in top casing when not in use
- It won't obstruct your view
- Works with all types of VELUX Blinds
- Easy to clean with a damp cloth

Finishing touches

We want to make your VELUX Blinds simple to operate. The following accessories are available exclusively from VELUX and make our Roof Windows even more user-friendly. (Remember, we also do blinds for our Vertical Windows and Roof Terrace Systems. For prices, please contact VELUX Customer Support.)

Accessories

Accessories For Hard-To-Reach Situations

Pole Control

Don't stand on a chair to open and close your VELUX Roof Window or to operate your blind. Do it the easy way with this handy pole. It allows you to open GGL and GGU Centre-Pivot Roof Windows. The pole can also be used to open the blinds when fitted with the correct adaptor.

Pole Adaptors

You'll need pole adaptors if you're using a pole to open and close out-of-reach blinds. Please bear in mind that you'll require a separate adaptor for each blind you have.

Pole Control Code ZCT 200 100-180cm Telescopic Pole For operation with GGL/GGU Roof Windows	£42.00
Pole Adaptor Code ZOZ 085	£7.20
Pole Adaptor White Code ZOZ 085 WL	£7.20
ZCT 100 100cm extension for the pole control ZCT 200	£24.00

Security Lock

ZOZ 012 Key operated window lock for GGL and GGU Centre-Pivot Roof Windows only. Extra security comes with this simple lock that reinforces the 'click shut' mechanism at the top of your VELUX Roof Window.

Security locks cannot be used on Top-Hung Roof Windows GPL, GPU, GHL and GHU.

Code ZOZ 012	£48.00
--------------	--------

Opening Restrictor with Key

Regulate the extent to which your VELUX Roof Window opens with this easy-to-fit safety catch.

• ZOZ 010 S011 for added safety.

Opening Restrictor cannot be used on Top-Hung Roof Windows GPL, GPU, GHL and GHU.

Code ZOZ 010 S011	£48.00
-------------------	--------

Prices include VAT and are valid from 01/02/12.
All fittings included in price.

Optimal energy control

Sustainable living

Fresh air and natural light are vital to the health of a home – and its energy consumption. So when you're choosing the right roof windows and blinds, remember to think about your home's energy profile, too.

Being energy efficient is about getting the most out of the energy you have available. When they're installed in the right place, roof windows can help heat your home with solar energy, as well as allow excellent ventilation. This in turn can reduce your home's carbon footprint.

And by selecting VELUX Blinds and Awnings with the right features you can save even more energy, bringing down your energy bill and helping you create a healthier indoor climate.

What does energy balance mean?

Roof windows can receive and release energy. When the sun hits a window pane, the rays are transformed into heat inside the room. And when the temperature outside starts to drop, the pane will start to lose heat energy to the outside environment.

Reduce
heat

Protect your home against the heat from the sun

When the weather is warm, you need to reduce the heat effect of the sun. An outside awning blind, for example, will reduce the heat effect by up to 90%.

Improve
insulation

Safeguard your home against heat loss

Modern roof windows are well insulated – interior sunscreening can further improve this insulation by up to 20%.

Project Daylight Our promise

For over 60 years we've maintained our tradition of quality and craftsmanship. Improving productivity in the workplace, helping homeowners make the most of their living spaces and bringing light to life in buildings all over the world.

Through Project Daylight we not only promise to continue this tradition, but to build on it.

We want to break new ground in the way light is controlled, harnessed and enjoyed.

We want to help more people enjoy the benefits of natural light by making it an integral part of every room.

We want to provide people with products that are durable enough to continue to deliver light for years to come.
