

Pipe & Cable Ducting / Cover Board

CODE **GW510 / GW511**

Description:

The GW510 Pipe and Cable Ducting and GW511 Cover board is designed to provide a cost effective solution over traditional methods of shuttering which can be complicated and time consuming to form.

The duct is ideal for internal runs of cables and other services for up to two pipes in concrete screed floors.

Cover board joints should be staggered so not to coincide with duct joints so there is no risk of the duct distorting.

"T" joints and corners can be formed by mitering both sections of the ducting using a fine cut saw and are detailed in general fitting sheet (MBP 8067).

Future access is simply obtained by first removing the floor covering and then un-screwing the cover board.

PRODUCT	GW510 PIPE CABLE DUCT	GW511 COVERBOARD
COLOURS	WHITE	NATURAL
PACKING DETAILS	Packed in 10's in poly sleeve	Packed in 10's
WEIGHT	15kg per pack	23kg per pack
MANUFACTURING PROCESS	Impact modified U.P.V.C.	Exterior quality weather, boil proof grade plywood to BS EN 313
MANUFACTURING PROCESS	Injection Moulded	Injection Moulded
