

Material Safety Data Sheet

PS Uncured Elastoform Flashing

Section 1: Identification of the Product and Company Identification
Product Name: PS 228mm Uncured Elastoform Flashing
Use of Substance: EPDM Tape
Suppliers Details: Flex-R Ltd.
Sandswood House,
Hillbottom Road,
Sands Industrial Estate,
High Wycombe,
Buckinghamshire.
HP12 4HJ
Tel: 01494 448792 Fax: 01494 858433 Email: eng@classicbond.co.uk
Thank you for your inquiry regarding an MSDS for ClassicBond Sheeting and accessory products. The
following list of RubberBond products are considered to be an "Article" as under normal conditions of use
they do not pose a hazard in the work place or to the building occupants. Since these products or
"Articles" pase no health bazard under normal conditions of use there is no requirement for an MSDS

they do not pose a hazard in the work place or to the building occupants. Since these products or "Articles" pose no health hazard under normal conditions of use there is no requirement for an MSDS. For technical information on each of these products please refer to the Product Data Sheet (PDS) or Technical Data Bulletin (TDB) published on the ClassicBond website at <u>www.classicbond.co.uk</u>

Articles as defined: EPDM membranes EPDM flashings EPDM walkway pads HP Polyiso insulations HP and plates Metal edgings and copings

Background Information: OSHA promulgated the Hazard Communication Standard (HCS), also known as the "Right to Know" rule, to ensure that the hazards of all chemicals produced or imported into the U.S. are evaluated, and that information concerning their hazards is transmitted to employers and employees. The standard applies to all chemicals, which are known to be present in the workplace in such a manner that employees may be exposed to them under normal conditions of use or in a foreseeable emergency. For this reason it is incumbent upon manufacturers to assess whether or not their products present a hazard in the work place. The current definition of "Article" in 29 CFR 1910.1200 is provided as follows:

"Article" means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use.

A product or "Article" meeting this criterion is exempt from the MSDS requirement. OSHA realizes that manufacturers often provide MSDSs for reasons other than those of meeting the requirements of the Hazard Communication Standard and that this can cause confusion to downstream users. Flex-R's intent is to eliminate confusion by publishing MSDS sheets for the products that workers and end-users really need to operate in a safe environment. Flex-R believes the information contained herein to be very accurate. It is not to be taken as a warranty or representation for which Flex-R Ltd. assumes any legal responsibility for product liability. This information is offered solely for our customers' consideration, investigation and any necessary verification. Any use of this information or of the sheeting and accessories provided by Flex-R Ltd. must be determined by the user to be acceptable for their intended purpose and in accordance with the appropriate state or local laws and regulations.
