

WARM HOME : USEFUL LOFT

Hello, my name is Lofty and I am here to help you install your Loft Leg XLs. Below are four simple steps for you to follow, however should you need any more help, feel free to email: asklofty@loftleg.com, alternatively you can watch my short installation film at: www.loftleg.com/loftlegxl

Loft Leg XL

YOU WILL NEED...

ELECTRIC SCREW DRIVER

No. 8 x 1 1/4"
MULTIPURPOSE
SCREWS
(4mm x 30mm)

CHIPBOARD OR
MDF PANELS
MINIMUM 18MM
THICK PANELS

STEP 1...

PRE-LOAD SCREWS
INTO PILOT HOLES
(THIS CAN BE DONE IN ADVANCE)

STEP 2...

POSITION LOFT LEGS
AT WIDTHS TO SUIT THE PANELS.
MAXIMUM RECOMMENDED
DISTANCE BETWEEN LOFT LEG
CENTRES IS 610MM*

STEP 3...

LAY OUT YOUR INSULATION

A SMALL VERTICAL SLIT IN THE
BLANKET WILL ALLOW FOR A BETTER
FIT AROUND THE LOFT LEG

STEP 4...

LAY THE PANELS ON
THE TOP PLATFORM,
SCREW THROUGH
PANEL AND LOFT LEG
TO SECURE.

* When using larger chipboard sheets, for added stability, fix additional Loft Leg XLs around the perimeter of the storage deck. See diagram overleaf.

IMPORTANT:

LOFT LEG XL RAISES THE HEIGHT OF A STORAGE DECK TO PREVENT COMPRESSION OF INSULATION.
THIS DECK SHOULD BE USED FOR LOFT STORAGE ONLY. LOADING LIMIT OF EXISTING CEILING STRUCTURE SHOULD BE CONFIRMED BY A STRUCTURAL ENGINEER.
THIS PRODUCT IS DESIGNED FOR DOMESTIC USE ONLY.
DO NOT USE IN DAMP CONDITIONS.
SAFETY INSTRUCTIONS WHEN INSTALLING: ENSURE ADEQUATE VENTILATION. USE OF MASKS AND GLOVES RECOMMENDED.

Email: asklofty@loftleg.com

DETACH HERE AND STAPLE TO THE STORAGE DECK

WARNING

THIS IS A RAISED STORAGE PLATFORM

DO NOT OVERLOAD

Caution: Max weight loading 50kg per square metre. Ceiling joists or trusses are normally designed for light domestic storage. It is the fitters responsibility to ensure that the existing ceiling structure and the new timber storage deck are capable of taking the necessary loads.

When installing insulation follow recommendations from the insulation manufacturer.
