

# Breathershield FR

Flame Retardant Certificate  
LPCB Approved to LPS 1207  
Cert. No 843a/02

## Description

Ensure newly laid flooring can breathe easily, whilst still protecting the surface with our unique permeable, flame retardant material - BreatherShield®.

It provides perfect floor protection for uncured surfaces, and is easy to roll out quickly and effectively. The flexible and lightweight breathable material is easily cut, but strong and resistant to rips or tears. It's spill and water resistant too, and certified flame retardant to LSP 1207 standard.

BreatherShield® is available in 100m rolls, with a width of 1m.

## Technical Specifications

Material	FR Non-Woven Polyethylene
Size	1mx100m
Permeability	Light transmission testing has shown that <0.5% of UV Light will get through due to high fibre density
Unit Weight	10 kg
Markings	Breathershield, Protec Logo, Certificate and details
